Day 25 · Operating costs: \$25,000.00

Reviewed preparation

CONFIRMED simulation: \$21,250.00 from Example bank A to Example bank B, recorded 2026-10-05T13:09:54.499Z.
Maximum shortfall \$17,000.00 before, \$0.00 after. No real money moved.

Assumptions and evidence

Existing funds only: future receipts, fees, interest, credit and processing delays are excluded. Accessible funds are assumed usable for scheduled obligations. Shortfalls are unmet obligations, not automatic credit.
Only this selected bank interruption is evaluated. This is not a bank failure prediction or an instruction to transfer real money.
Public bank evidence: snapshot 24d9811429aa7d5e-sage-numpy-8ce6324aab, collected 2026-10-02. Original publication dates unverified. Evidence is context only; it does not enter the calculation. Sources and reporting periods are in Bank Evidence.
This one-page summary shows up to 6 banks and 8 payments. Labels may be shortened with "...". Export JSON for complete inputs and reviewed history.
